

Developing More than Homes;
Developing Hope

Family/Community-Focused Builder

Huber's Custom Building, Inc. is a small, family owned and operated business. Mark Huber has been providing homes in the Seattle area for over 35 years and has provided hundreds of homes in the area. His daughter, Tanya, works side by side with Mark as a Designer, Project Manager and as his Real Estate Agent. Mark's wife, Arlene has been an integral part of the business managing the finances.

Building Green

We build 4-Star Built-Green homes and focus on providing homes that “Live Well”. We try to make every home, a place that we would enjoy living in. We believe it is important to have “Character” and features that the home owner can be proud of.

2030 NW 64th

We focus on infill development where we try to provide the best use of the resources available. Some of those projects may be to purchase a home for restoration and adding another home to achieve the density desired by the cities growth plan, or to build efficient, functional Townhomes.

We look at the best use of the density available to create a home that has Character and meets the needs of our customers.

Palatine Townhomes

We also try to provide Uniqueness ; where every home has its own charm and distinction.

Small Builder, Big Heart

With our focus on providing homes, we look at those that need them the most. There are families struggling to keep a roof over their head and a dry place to rest. One example is a family of 6 surviving on \$250.00 per month to provide clothes for their kids and food on the table. There was little left to construct or maintain a home, so we built one for them.

Huber's Custom Building, Inc. has been providing homes for families in need by providing funds, raising money, putting together teams and going to impoverished countries and providing HOPE in the form of homes for these families. Mark has been successful in the construction of over 20 homes.

What is a Home?

For those in need, a home is a shelter, where they are out of the rain and have a place to sleep.

This is what we do

We have teamed with families that purchased our townhomes and some of our trade contractors to provide materials and our labor to build homes for families in need.

Developing More than Homes; Developing Hope

Huber's Custom Building Inc. has teamed with homeowners, trade contractors and friends in business to maintain a regular program of providing homes to the poor. Our goal is to allow people to experience the opportunity to help others in need. With our passion for building homes and our skills in coaching others, we are able to take people that have never lifted a hammer and allow them to build homes for those that need them.

With the resources that Dwellings has provided, we have been able to take anyone that is interested to build homes for deserving families.

Building Homes, Building Teams to Change Lives

Our goal is to raise our awareness of the world around us and allow us to utilize and appreciate the value of shelter and a home. To respect the things we take for granted like drinkable water, power, electricity and to have transportation available to us. It is also allowing people to make a difference by providing help and hope to a family. Having a home and a place that holds your pillow allows for hope and the ability to dream instead of having to focus your efforts on your next meal and just trying to stay warm and dry.

Regarding Mark Huber: Those who were inexperienced, he taught; those who were skilled, he encouraged to help; and all who joined him were enriched by their shared experiences and loved the life-changing experience. The families who received the new homes had their lives changed forever....
