

HUBERS
CUSTOM BUILDING INC.

“I believe the best gift you can give a person is a roof over their head and the opportunity to get an education.”

- Mark Huber, President

Who we are...

Our company is a small family-owned business that has been building in the Seattle area for the past 35 years. We are a father-daughter team that builds, designs, and creates relationships our customers, subcontractors, and neighbors.

We believe in building homes that are efficient, livable, and something to be proud of. It’s not all about a business; it’s about our city, our neighbors, and giving back.

We blend our services to not only create modern homes with character and detail for young professionals, but also provide for those with no homes at all.

Our success has allowed us to give a portion of our profits and skills to building homes in developing countries and helping those globally and locally who can really use a home.

Huber’s Custom Building Inc. only does a few projects a year and we put pride and devotion into our design and details. Our goal is to provide a home that fully meets the needs of our customers in quality, functionality, and character.

Reflections of 2016

By Mark Huber, President

I wanted the 35th year of business to tell a story about who we have become and have it make a statement about who we are. I am proud of where we are and I feel we are making a difference.

This year we have used our skills to provide homes to those that need them both internationally and locally. We have helped families move forward to a higher level of education and opportunity. We have supported our community and places of worship. We have worked to provide medical clinics in areas of the world that need our help. We also try to benefit the community by building homes in our neighborhoods that are focused on livability, function, character, value, and that enhance our communities.

2016 Projects

Roatan Home Build in Spring Garden

A team of friends and I provided a 3 Bedroom home for a family.

Roatan Home Build with Creekside Church

We provided two homes, side by side, for two families in need.

St. Marks Church

I designed, built and donated the choir loft for St. Mark's Church.

Hart Fire

We donated a home to a family that lost everything in a fire that had no insurance in Shoreline, Wa.

Kenya Medical Clinic

We raised funds for staff housing for a clinic we worked on last year. It is now framed with a roof.

Uruguay Church

The goal was to take a team to Uruguay to build a church, but I broke my leg a week prior to leaving, so I purchased a ticket so my Daughter Nicole could go in my place.

Cofradia, Mexico

I went to Mexico to build a block home for a deserving family and to learn the system so we could do the same thing in Cuba in the spring.

Education

In addition to providing homes, the greatest gift a person can be given is the gift of knowledge. I am sponsoring college educations for some young adults in Roatan. One is entering her 3rd year of college and doing very well, the newest student is entering her 1st year of college on the mainland and wants to become a structural engineer.

Fremont Build

We successfully completed a 4 unit townhome project in Fremont. That area is the hardest market to break into because it has a long standing history of being one of the most desirable areas for young professionals. We will be spending our 3rd year within 100 feet of the same location. We have been developing a following in the neighborhood by providing good design and functionality, livability, quality, service and character that is appreciated by our customers.

Spirit of Service Award

Locally, I was honored by the Master Builders Association with the Spirit of Service Award for making a difference in the community.

The monetary benefits to others in 2016 exceeded \$200,000, and the educational support and belief in people is priceless.

Where will 2017 take us, this business, and our mission? How will we make a difference?

Thank you for supporting us on this journey as we find out what's next.
